MEMORANDUM FOR ASSISTANT FOR LAW ENFORCEMENT AND PHYSICAL  
SECURITY, OFFICE OF THE CHIEF OF NAVAL OPERATIONS  
(NO9N3)

SUBJECT: Request for Approval of Internal Locking Device (ILD) System for High Security  
Magazines

Reference is made to your letter of February 5, 2001, subject as above (Serial  
NO9N3/1Y533912).

Your request for OSD approval of the Navy developed Internal Locking Device (ILD)  
system for magazines storing risk category arms, ammunition, and explosives, is granted. The  
ILD may be used as an alternative to the current high security padlock and hasp requirement.

The efforts of the Naval Facilities Engineering Service Center in developing this locking  
system to meet an operational requirement of the U. S. Army is commendable, and reflects a  
continued commitment to excellence by the Center in meeting the security needs of the  
Department of Defense.

A handwritten signature in black ink that reads "Richard F. Williams".

Richard F. Williams, CPP  
Director of Security
