

NAVAL FACILITIES ENGINEERING SYSTEMS COMMAND TECHNOLOGY TRANSFER UPDATE

Issue 222: April 12, 2023

Department of Defense (DoD) Strategic Environmental Research and Development Program (SERDP) and Environmental Security Technology Certification Program (ESTCP) Webinar Series

Demonstration and Implementation of Fluorine-Free Firefighting Foams. Join SERDP and ESTCP on Thursday, April 20 at 12 pm ET for a webinar featuring five DoD-funded research efforts to evaluate the performance of per- and polyfluoroalkyl substances (PFAS)-free firefighting foams and the Navy's efforts to develop a fluorine-free foam military specification. This webinar will feature speakers from Jensen Hughes and the Naval Sea Systems Command (NAVSEA).

Risks, Resilience, and Readiness of Military Lands Facing Coastal Flooding. Join SERDP and ESTCP on Thursday, May 4 at 12 pm ET for a webinar on coastal flooding models. This webinar focuses on DoD-funded research efforts to improve natural resource management by refining our understanding of how disturbance and climate variability impact DoD lands. The Principal Investigators (PIs) will cover modeling assessments to address flooding and rising water levels on DoD lands. The PIs are from the University of Delaware and the U.S. Army Engineering Research and Development Center-Construction Engineering Research Laboratory (ERDC-CERL).

Interstate Technology Regulatory Council (ITRC) PFAS Introductory Training Webinar

Join ITRC on Thursday, April 13 at 1 PM ET for a webinar on the emerging science of PFAS. This webinar was developed to provide user-friendly materials to present PFAS information to stakeholders, regulators, and policy makers. The training includes topics such as PFAS properties, fate and transport, sampling and analysis, and treatment technologies.

ITRC Quickening Environmental Solutions and Training (QUEST) Knowledge Map

A new tool has been published to gain rapid access to the full range of resources available from ITRC. The ITRC QUEST Team has released a Knowledge Map that catalogs ITRC's documents by concise subjects and focus areas. The tool provides an interactive expanding tree that helps users to more easily locate and scan information on core environmental concepts.

View the ITRC Knowledge Map at the link below:

About This Email

This email supports the NAVFAC Environmental Restoration Program by providing the latest information on policy, guidance, and training related to innovative technologies. Links are provided to Technology Transfer (T2) resources and tools. Our goal is to promote the use of innovative technologies, remove barriers to implementing new technologies, and reduce cleanup costs, while remaining protective of the environment and human health.
