Technology Transfer Update

This e-mail supports the NAVFAC Environmental Restoration Program with the latest information on policy, guidance, and training related to innovative technologies. Links are provided to Technology Transfer (T2) resources and tools. Our goal is to promote use of innovative technologies, remove barriers to implementing new technologies, and reduce cleanup costs, while remaining protective of the environment and human health.

NAVFAC Munitions Response Quality Assessment Spreadsheet

Department of the Navy (DON) Remedial Project Managers (RPMs) can use the NAVFAC Munitions Response (MR) Quality Assessment (QA) Spreadsheet as a tool to evaluate the quality of their contractor's MR actions. The tool helps to ensure contractual requirements are met. The MR QA Spreadsheet includes a series of questions to ask to support the development of content for the Quality Assurance Surveillance Plan (QASP), as well as during the performance of a project. The tool can also be useful for third-party QA contractors and/or unexploded ordnance (UXO) contractors to perform a third-party or internal review of project performance.

Download the MR QA check list at:

Top Pages for the NAVFAC Environmental Restoration and BRAC Web Site

NAVFAC's Environmental Restoration and BRAC (ERB) web site has been designed as a one-stop resource for DON personnel, contractors, and the public interested in environmental site cleanup efforts. The ERB web site features program support, focus areas, and training resources. Topic-specific web pages summarize key environmental restoration issues and provide links to the latest technical resources.

The top 5 most visited ERB Web pages include those linked below:

- **Resources**
  https://www.navfac.navy.mil/navfac_worldwide/specialty_centers/exwc/products_and_services/ev/go_erb/resources.html
- **Information Management**
