

This e-mail supports the NAVFAC Environmental Restoration Program with the latest information on policy, guidance, and training related to innovative technologies. Links are provided to Technology Transfer (T2) resources and tools. Our goal is to promote use of innovative technologies, remove barriers to implementing new technologies, and reduce cleanup costs, while remaining protective of the environment and human health.

Issue 204

October 12, 2021

Follow the NAVFAC T2 Program for Environmental Restoration and BRAC

We are excited to launch a LinkedIn Showcase page to enhance outreach to the Environmental Restoration (ER) community. View the latest Navy ER news, resources, and webinars. Follow us today to learn more at: <https://www.linkedin.com/showcase/navfacerb>.

NAVFAC Open Environmental Restoration Resources (OER2) Webinar

The NAVFAC Optimization and Technology Innovation Workgroup has developed a strategy to support sites of varying complexity transition from the Remedy-in-Place (RIP) milestone to the Response Complete (RC) milestone. This OER2 webinar series will discuss the RIP/RC strategy along with other relevant policies and tools in light of the current programmatic goals, including the new Navy ER Program metrics for the RC milestone. Examples will be given for sites of low, moderate, and high complexity to demonstrate the relative timelines and strategies for each type of site. This webinar will be offered in two parts. The first part will focus on the strategies and requirements along with providing a Navy case study for a low complexity site. The second part will focus on Navy case studies for sites with increasing complexity.

Topic: Bridging the Gap from RIP to RC: Part 1 Strategies and Requirements

Presenters: Russell Sirabian, NAVFAC EXWC; Michael Singletary, NAVFAC Southeast; and Michael Gonzales, NAVFAC Southwest

Date: November 18, 2021

Time: 11 AM PT | 2 PM ET

Hosting Public Meetings on Virtual Platforms

As part of its commitment to community stakeholders, the Department of the Navy (DON) facilitates public meetings during key milestones in the cleanup process at ER sites. A public meeting supports communication efforts when the level of interest is high or a large amount of information needs to be shared. Several formats can be used to conduct a public meeting. Recently, virtual or online meetings have become a common way to meet. This fact sheet provides considerations for the selection of outreach methods and best practices for implementing successful virtual meetings.
